

ColoradoComebackLive.com

Build Brief

How to read this document

This brief is written so that **all copy shown in quotes or block format is the actual final copy** that appears on the website. Do not use any of the descriptive language outside of quotes as visible text on the site. Words like "hero," "section," "card," "form" are layout descriptions for the designer, not site copy.

When the brief says *"the headline reads,"* the words that follow in italics or quotes are what the visitor will literally see. Render them exactly.

What this site is

A registration and check-in destination for Mission 151 — a live broadcast on May 6, 2026, where Victor Marx, candidate for Governor of Colorado, will host an event for the entire state.

The site has three jobs and only three jobs:

1. Convert ad traffic into pre-registrations before May 6
2. Capture County Captain applications
3. Host the live check-in flow during the broadcast on May 6 (7:00–8:30 PM Mountain Time)

This site is not the broadcast. The broadcast lives on YouTube and Facebook. The site is the door.

The site does not host video. It does not accept donations. It does not publish the names of Shadow Council members, the contents of the pledge document, or the structure of the broadcast. The site exists to make people want to be there on May 6, and to capture them when they say yes.

Visual direction

The site does not look like a campaign website. It looks like an operations console — a quiet, dark, cinematic interface. References: the title sequences of *Sicario* and *True Detective*. Modern command-center dashboards. Documentary film, not political mailer.

There are no flag overlays, no smiling-family photography, no red-white-blue color blocks, no clip art. Restraint is the design language.

Color palette

Use	Hex
Page background	 #0a0e14
Cards / elevated surfaces	 #111822
Accent surfaces	 #1a2332
Primary text	 #e8e4d8 (warm off-white, never pure white)
Secondary text	 #8b9199
Faint text / fine print	 #4a5259
Mission red (primary CTA)	 #c8322c
Hover red	 #e63e37
Amber (live status accents)	 #d4a032
Signal green (lit county states)	 #5fb85f
Subtle borders	<code>rgba(232, 228, 216, 0.1)</code>
Strong borders	<code>rgba(232, 228, 216, 0.25)</code>

Typography (Google Fonts)

- **Display weight headings:** Staatliches — condensed, stencil-adjacent, used for big numbers and major titles only
- **Body and most UI:** Instrument Sans — clean modern sans-serif, weight 400 and 500
- **Italics for emphasis or quotes:** Instrument Serif italic — used sparingly for emotional weight
- **Numerals, timestamps, anything technical:** JetBrains Mono — used minimally, for small live-data displays only

Visual texture

A near-invisible 40px × 40px grid sits behind the entire site at `opacity: 0.015`. It should not be

perceptible at first glance. It contributes a subliminal sense of structure.

What to avoid

No section eyebrows like "THE ASK" or "BEFORE THE MISSION." No all-caps tag labels above headlines. No watermark words floating behind the hero. No copy that describes a feature ("when you register, your county lights up on the map") — instead, the copy invites the action.

Site-wide elements

Top bar (every page, sticky)

A thin bar across the top, dark with subtle backdrop blur. From left to right:

- A small green dot, slowly pulsing, followed by the text **Live May 6** in small monospace
- Three navigation links in the center: **About / Watch / Register**
- A small red button on the right: **Register**

That is the entire top bar. No other text, no logo wordmark, no "Victor Marx for Governor" — the brand identity is the dark aesthetic itself.

Footer (every page)

A simple three-zone footer at the bottom of every page.

Top zone, left side, in small text:

┃ Mission 151 is the live launch of the Colorado Comeback. May 6, 2026.

Top zone, right side, four small links: **About / Watch / Privacy / Terms**

Bottom zone, centered, in monospace at small size:

┃ Paid for by Victor Marx for Governor.
┃ [Registered agent name and physical mailing address — to be provided by the campaign
┃ before launch]
┃ Not authorized by any candidate or candidate's committee other than Victor Marx for
┃ Governor.

Live status banner (only May 6, 6:50 PM – 8:45 PM MT)

When the broadcast is live, a thin red bar appears across the top of every page, just below the top bar. It contains, from left to right:

- A pulsing red dot
- The text **We're live now.**

- A right-arrow link: **Watch and check in** →

Clicking the bar takes the visitor to `/live`.

Page 1 — Home (`/`)

This page exists to convert cold ad traffic into pre-registrations. A visitor lands here from a TikTok ad, a YouTube pre-roll, a Facebook click. They are skeptical. They have eight seconds before they leave.

The page is structured as a single scroll, six sections deep, with the registration form appearing as the conversion point in section five. The whole page builds toward that form.

The hero (first thing they see)

A two-column layout that fills the screen on desktop, stacks vertically on mobile.

Left column takes about 60% of the width. It contains, from top to bottom:

A small line of monospace text in dim ink: **May 6, 2026 • 7:00 PM Mountain Time**

The headline, set in Staatliches at the largest scale on the page:

| Mission 151

Below the headline, an italic serif subhead in primary text color:

| *The biggest rescue mission of Victor Marx's life. And this one is for Colorado.*

Below the subhead, a single line of body copy at normal weight:

| Live for every county. Watch on YouTube or Facebook. Register here so your county is part of it.

Below that, two buttons side by side:

- A primary red button: **Register your county**
- A subtle outline button: **Watch live**

Both buttons live-anchor to sections lower on the page (the form for the first, a watch-instructions section for the second).

Right column takes about 40% of the width. It contains a single object: a live countdown card.

The card is dark, slightly elevated from the page background, with a thin red top border. Inside the card, large Staatliches numerals show the countdown to May 6, 7:00 PM Mountain Time. Days, hours, minutes, seconds. The numerals update in real time.

Below the numerals, in small monospace text:

┆ Until Colorado comes home.

That's the entire countdown card. No watch info, no broadcast metadata, no headers. Just the time remaining and the line beneath it.

Background: Behind the entire hero, a soft outline of the state of Colorado, almost invisible — only `opacity: 0.04`. No watermark words, no graphics, no other texture beyond the site's base grid.

The contrast

After the hero, a single section that sets up the choice the visitor is being asked to make. Background is the slightly elevated dark.

The section is a horizontal layout — two paragraphs side by side, divided by a thin vertical line in the center. On mobile, they stack with a horizontal divider between.

Left side, in dimmer text, with a slight strikethrough effect on the headline:

┆ **A forum.**
Three candidates. A banquet hall in Parker. Folding chairs and a moderator. Ninety minutes of debate, and nothing changes.

Right side, in full primary text:

┆ **A mission.**
Every Colorado county in the same room. A team appointed live. A pledge signed on camera. Real questions, real answers, on the record.

Below the two columns, centered, a single small line of body copy:

┆ May 6. You choose where to be.

The record

The next section establishes credibility for visitors who don't know who Victor is. Background returns to the page background.

A single intro line, italic serif, max-width about 600 pixels, centered:

┆ *This is not Victor Marx's first operation.*

Below it, a four-column row of large stats. Each stat has a big Staatliches number in mission red, with a one-line label below it in small monospace, and a single line of body text underneath. The four columns are divided by thin vertical lines.

Number	Label	Description
150	Rescue missions	Across more than 40 countries — Iraq, Syria, Cambodia, Somalia, and the places most people will never see.
45,000	Lives recovered	Women and children pulled out of trafficking, war zones, and captivity.
23	Years on the front	Founded All Things Possible Ministries in 2002. Still running it today.
2M+	People who follow him	An audience built on documented action. Not campaign rhetoric.

On mobile, this stacks to two columns, then one.

The promise

A single quiet section. No header. Just one block of italic serif text, centered, max-width about 700 pixels:

*On May 6, every county in Colorado is in the same room together for ninety minutes.
Real questions. Real answers. A team. A commitment. A state coming home.
Be there. Bring your county with you.*

Below, a single button centered: **Register your county**

The form

This is the conversion point. The visitor has scrolled past the hero, the contrast, the record, the promise. Now they get the action.

The section has two columns. On the left, a quiet preview of the live county map — a stylized representation of Colorado with all 64 counties shown. Most are dark. A few are dimly outlined in green (representing pre-registrants from those counties already in the database). None are glowing yet — that only happens during the live broadcast. Above the map, two small monospace lines:

Live map preview · Updates as people register
[number] of 64 counties standing by

On the right, the registration form. The card is dark, slightly elevated, with a thin red top border.

At the top of the card, a single Staatliches headline:

Register your county

Below it, one line of body copy:

Less than a minute. Yours becomes part of the map.

The form fields, in order:

- **First name** (required) — a clean text input
- **Last name** (required)
- **Email** (required)
- **Mobile number** (optional, with placeholder: (303) 555-0123)
- **Your county** (required, dropdown showing all 64 Colorado counties — list provided at the end of this brief)
- A larger checkbox, slightly emphasized:
 - I want to lead the mission in my county. Apply to be a Colorado Comeback County Captain. Victor reviews these personally.

Conditional consent — appears only if the user enters something into the mobile number field:

A single checkbox, with this exact label:

Send me text reminders about Mission 151. *By checking this box, I consent to receive automated text messages and pre-recorded calls from the Victor Marx for Governor campaign at the number provided. Consent is not required to register. Message and data rates may apply. Reply STOP to opt out, HELP for help.*

(This checkbox cannot be pre-checked. It is hidden when the mobile number field is empty.)

Submit button — full-width, mission red, Staatliches, large:

Register your county

Below the button, a single line of small monospace text in faint ink:

By registering, you'll receive email updates from the campaign. Unsubscribe anytime.
Privacy · Terms

On submission, the form replaces itself with a quiet success state. The card stays the same size. Inside, centered:

You're in.
[Their county] is now standing by. On May 6, you'll come back here to light it up live.
[A small button: **Tell your neighbors**]

If they checked the captain box, an additional line appears:

Victor will be in touch about the Captain program. Watch your inbox.

The footer of the page

The standard site-wide footer described above. Nothing more.

That is the entire homepage.

Page 2 — Live (`/live`)

This page changes shape three times depending on when a visitor arrives. The state transition is automatic, controlled by date and time, with an admin override.

State 1 — Before the broadcast (any time before May 6, 6:50 PM MT)

The page is quiet. Almost monastic. A single screen, no scrolling needed.

At the top, large Staatliches countdown numerals — same as the homepage hero, but bigger, centered, dominant:

| 12 days 4 hours 22 minutes 08 seconds

Below the countdown, italic serif text, centered, two short lines:

| *Mission 151 launches in [countdown].*
| *Be ready to light up your county.*

Below that, the same registration form as the homepage, centered, max-width about 500 pixels.

Behind everything, a soft animated outline of Colorado, very dim, with counties slowly pulsing (a subtle background animation — quiet, not distracting).

That's the entire pre-event Live page.

State 2 — During the broadcast (May 6, 6:50 PM - 8:45 PM Mountain Time)

The page transforms into the live operating environment. The countdown disappears. In its place, two zones.

At the top of the page, a wide red bar with three elements:

- Left: a pulsing red dot followed by the text **We're live now.**
- Right: two large buttons, side by side:
 - **Watch on YouTube** (links out to the YouTube Live URL)
 - **Watch on Facebook** (links out to the Facebook Live URL)

Below the bar, in small body text, centered:

| *Already watching elsewhere? Stay on this page to check in and light up your county.*

Below the bar, the main page splits into two columns on desktop. On mobile, the right column appears first, and the map appears below.

Left column (about 60% of the width, the larger piece): the live county map. This is the centerpiece of the page.

Above the map, two small monospace lines:

| Colorado · Live
| [count] of 64 counties lit

The map itself is a real-shape Colorado outline with all 64 county boundaries drawn. Each county exists in one of three states:

- Dark (default — no one from this county has interacted)
- Dim green outline (someone in this county pre-registered but hasn't checked in live)
- Glowing solid green (at least one person in this county has checked in live during the broadcast)

The major population counties — Denver, El Paso, Adams, Jefferson — get progressively more intense as more people from those counties check in. Smaller counties stay binary (dark, dim, or fully lit).

The map updates from the database every 3 to 5 seconds. There is no refresh button, no manual control on the user's side — it just lives.

Right column (about 40% of the width, the conversion path).

At the top of this column, a small live counter card:

| **[number]**
| *People checked in*
| [smaller number] counties lit

Updates in real time.

Below the counter, the check-in form. The card is dark, with a thin red top border. Inside:

| **Light up your county**
| *One tap. Your county glows on the map. Victor sees it the moment you check in.*

Form fields, simplified to the minimum:

- **Email** (required — auto-detects pre-registered users by email match)
- **Your county** (required if not auto-filled by email match)

A submit button, full-width, mission red:

| **Light up my county**

No phone number is collected here. No SMS consent disclosure needed.

Below the button, in small faint text:

| By checking in, you'll receive email updates from the campaign. Unsubscribe anytime.

On submission, the form replaces itself with a celebratory state:

| **[Their county] just lit up.**
Look at the map. Find your home. Tell your neighbors to do the same.
[A small share row: Facebook, X, Copy link buttons]

The user's county on the big map (left column) visibly transitions from dim outline (or dark) to glowing green at the moment of submission. A subtle pulse animation accompanies the change.

Below the two columns, a thin band across the page with one small monospace line:

| Now playing on the broadcast: *[current segment name, manually set by the producer]*

This line updates as the producer toggles segments throughout the broadcast. It exists to give context without spoiling.

That is the entire live state of the page.

State 3 — After the broadcast (May 6, 8:45 PM MT onward)

The page transforms one more time, into a recap and replay destination.

At the top, a single line in monospace:

| Mission 151. The Colorado Comeback. Launched.

Below, a Staatliches headline:

| **Sixty-four counties.**
One state.
The mission has begun.

Below the headline, a four-column stat row showing what happened during the broadcast:

Number	Label
[count] / 64	Counties lit
[count]	People checked in
[count]	County Captains stepped up
[count]	People watched live

Below the stats, two large buttons side by side:

- **Watch the replay on YouTube**
- **Watch the replay on Facebook**

Below the replay buttons, a row of four highlight cards. Each card is a video thumbnail with a title, click-through to YouTube. The four titles:

- The cold open
- The Shadow Council, live
- The signing
- The map at the end

(The thumbnails and links populate from a CMS or are added manually after the broadcast.)

At the bottom, a quiet final block:

Mission 151 was the launch. The mission continues.

[Email signup field — single email input, single submit button **Stay with the mission**]

[Captain checkbox: **I want to lead the mission in my county**]

That is the full post-event state.

Page 3 — Check-In (`/checkin`)

This page exists for one reason: it is the destination for the SMS reminder link that goes out at 6:55 PM on May 6. People tap that link from their phone and need to check in within ten seconds. The page is built for that single user, that single moment.

The page has three states.

Before the broadcast (before May 6, 7:00 PM MT)

A single, clean screen.

At the top:

Mission 151 launches in
[countdown numerals]

Below the countdown:

Your check-in opens the moment we go live.
Until then — pre-register so your county is standing by.

A single button: **Pre-register your county** (links to homepage form).

Nothing else.

During the broadcast (May 6, 7:00–8:30 PM MT)

A single, clean screen optimized for fast action on mobile.

At the top, a Staatliches headline:

Light up your county.

Below it, one line:

One tap. Your home glows on the live map.

The form, large and finger-friendly:

- **Email** (auto-detects pre-registered users by email match)
- **Your county** (auto-fills if email is found, otherwise dropdown)

A single huge mission-red submit button:

Light it up

Below the button, a small faint line:

By checking in, you'll receive email updates from the campaign. Unsubscribe anytime.

On submission, the screen transforms:

[Their county] just lit up.
Find your home on the map.

A small inline visual of the user's county on a Colorado outline, glowing green.

Below, two action buttons:

- **Watch live** (links to YouTube)
- **Tell your neighbors** (opens share sheet on mobile)

That's the entire screen during broadcast.

After the broadcast (May 6, 8:30 PM onward)

A simple thank-you screen.

Mission 151 just lit up Colorado.
Thank you for being part of it.

Two buttons:

- **Watch the replay**
- **See what happened**

The "See what happened" button takes them to the post-event Live page.

That's the entire check-in page.

Privacy and Terms

Two additional pages, accessed from the footer. These can use a standard template — there is no need for custom design beyond using the same dark aesthetic and typography.

/privacy

A standard privacy policy. Cover what's collected (name, email, phone, county, IP, browser data), how it's used (campaign communications, voter outreach), who it's shared with (campaign vendors, never sold), user rights (access, correction, deletion, opt-out), cookie disclosure, children-under-13 disclaimer, contact email for inquiries, and last-updated date.

The campaign's legal counsel will review and approve before launch.

/terms

A standard terms of service. Cover acceptable use, disclaimer of warranties, limitation of liability, governing law (Colorado), contact for legal inquiries, last-updated date.

The campaign's legal counsel will review and approve before launch.

What goes on the screen versus what stays in this brief

To remove all ambiguity:

These words appear on the live website:

- All text inside quotes and italics in this brief
- All form field labels exactly as written
- All button labels exactly as written
- The headlines (Mission 151, Register your county, etc.)
- The legal language at the footer

These words DO NOT appear on the live website:

- "The Ask"
- "The Record"
- "The Promise"
- "The Form"
- "The Hero"
- Any section name from this brief that is not in quotes
- Any monospace tag like "JOIN MISSION 151" or "BEFORE THE MISSION" — these were placeholders that should not be rendered
- Any "Eyebrow:" or "Section:" notation

The site copy is what's in quotes. The descriptive language around it exists for the designer to understand structure.

Compliance

Email under CAN-SPAM

Email is opt-out, not opt-in. No checkbox is required. Compliance requires:

- Every email sent from the campaign must clearly identify "Victor Marx for Governor" as the sender
- Every email must contain a working unsubscribe link
- Unsubscribe requests must be honored within 10 business days
- Every email must include the campaign's physical mailing address in the footer

- Subject lines must not be deceptive
- The site footer informs users that registering means they will receive email updates — that disclosure is sufficient under CAN-SPAM

SMS and pre-recorded calls under TCPA

SMS and autodial calls require prior express written consent. The single conditional checkbox on the registration form (which only appears when a phone number is entered) handles this.

The exact required language for the checkbox appears in the Home page section above.

Storage requirements:

- Each consent must be stored with: timestamp, IP address, the exact language the user agreed to, and which form/page they consented on
- Consent records retained for at least 4 years
- STOP requests honored within 24 hours, removing the contact from all SMS lists
- HELP messages trigger an automated help response
- No SMS or pre-recorded calls before 8:00 AM or after 9:00 PM in the recipient's local time zone

The vendors (SimpleTexting or Twilio) handle the operational side. The site captures the consent.

FEC

Every page must include the "Paid for by Victor Marx for Governor" disclaimer in the footer along with the registered agent name and address.

Technical stack

- HTML, CSS, vanilla JavaScript
- Tailwind CSS (CDN or compiled)
- Hosted on Netlify, Vercel, or Cloudflare Pages
- Forms run through Tally with native Airtable integration
- Database: Airtable, with two tables — pre-registrations and live check-ins, linked by email
- Live map: a custom JavaScript page that reads from Airtable every 3-5 seconds and renders a Colorado SVG with three visual states per county
- A producer-only admin override page (password-protected) allows manual map control if the data feed fails

- A pre-rendered fallback animation of the map sequence is stored locally as an emergency cut-in
 - Email handled by Mailchimp; SMS handled by SimpleTexting or Twilio
 - Both must respect time-of-day calling restrictions and STOP/HELP behaviors
-

Performance

- All pages load in under 2 seconds on 3G mobile connections
 - The live page must support 50,000 or more concurrent visitors
 - Form submissions complete in under 1 second
 - Images optimized for WebP delivery
 - HTTPS only, hCaptcha invisible challenge on forms
 - WCAG 2.1 AA accessibility minimum
-

Build timeline (six working days)

- **Day 1:** Architecture, base styles, the Home page
- **Day 2:** The Live page, all three temporal states
- **Day 3:** The Check-In page, Privacy, Terms, footer compliance
- **Day 4:** Tally + Airtable integration, conditional consent capture, registration testing
- **Day 5:** The custom map page, Airtable API integration, three-state visual logic, fallback animation
- **Day 6:** Mailchimp + SMS reminder configuration, full integration testing, load testing, FEC compliance review

The day before the broadcast (May 5) is reserved for final QA, content review, and a dress rehearsal alongside the production team.

Priorities if time runs short

If parts of this brief have to be cut to ship on time, this is the order to cut in:

Cannot ship without:

1. The Home page with the registration form

2. The Live page in all three states
3. The Check-In page during broadcast
4. The Tally → Airtable integration with conditional SMS consent
5. The live map pulling from Airtable
6. The four reminder emails staged in Mailchimp
7. The two reminder SMS messages staged for consented contacts
8. FEC and CAN-SPAM compliance throughout
9. The conditional TCPA SMS consent

Can ship without (add post-event):

1. The post-event highlight clips on the Live page (May 7 addition)
 2. The animated background map on the homepage hero
 3. The population-weighted intensity for major counties
 4. The producer dashboard manual override (use the fallback animation instead)
-

Content the campaign must provide before launch

- Registered agent name and physical mailing address (FEC + CAN-SPAM)
 - The YouTube Live URL and Facebook Live URL for the broadcast (closer to May 6)
 - Final-approved copy for any campaign-specific legal language
 - Any updated stats or numbers if the 150/45,000/23/2M figures change
-

The 64 Colorado counties (for the dropdown)

Adams, Alamosa, Arapahoe, Archuleta, Baca, Bent, Boulder, Broomfield, Chaffee, Cheyenne, Clear Creek, Conejos, Costilla, Crowley, Custer, Delta, Denver, Dolores, Douglas, Eagle, El Paso, Elbert, Fremont, Garfield, Gilpin, Grand, Gunnison, Hinsdale, Huerfano, Jackson, Jefferson, Kiowa, Kit Carson, La Plata, Lake, Larimer, Las Animas, Lincoln, Logan, Mesa, Mineral, Moffat, Montezuma, Montrose, Morgan, Otero, Ouray, Park, Phillips, Pitkin, Prowers, Pueblo, Rio Blanco, Rio Grande, Routt, Saguache, San Juan, San Miguel, Sedgwick, Summit, Teller, Washington, Weld, Yuma

Final note for the design tool

Treat the words inside quotes and italic blocks as final user-facing copy. Render them exactly. Do not invent new headers, eyebrows, tags, or labels beyond what is written here. The site is designed to be quiet, restrained, and direct — every element earns its place by serving the conversion of a stranger into someone who shows up on May 6.

If a section in this brief has no header in quotes, that section has no visible header on the live site. That is intentional. The strategic discipline is restraint: do not add chrome.

Build accordingly.
